

Related Greening Government Goal: The Council shall develop educational materials for state employees on sustainability, stewardship, climate change, and other environmental issues, so that employees better understand the reason for this Executive Order. All agencies and departments shall educate employees regularly using these materials.

During the third calendar quarter of 2007, the state hired over 4,200 new employees. Does your organization use a new-employee orientation process? Does it include information about the Greening Government program purpose and goals?

As we move into 2008, the Council will develop Greening Government training materials to inform new and long-time employees at all levels of the organization. Meanwhile, work with your Green Team to raise awareness – provide training materials you have developed, make the Greening Government Executive Orders available, or refer employees to our web site: www.colorado.gov/energy.
